

10,000psi IHPU

Multi-fluid injection system

The 10,000psi IHPU can be used for numerous subsea applications including pressure testing, BOP operation, fluid transfer and hot stab operations with the capability of directional control ranging from 1,150-10,000psi which can be operated proportionally.

Connection can be made to any sized fluid reservoir and operate using water / glycol and hydraulic mineral oils as suitable fluid media.

Applications

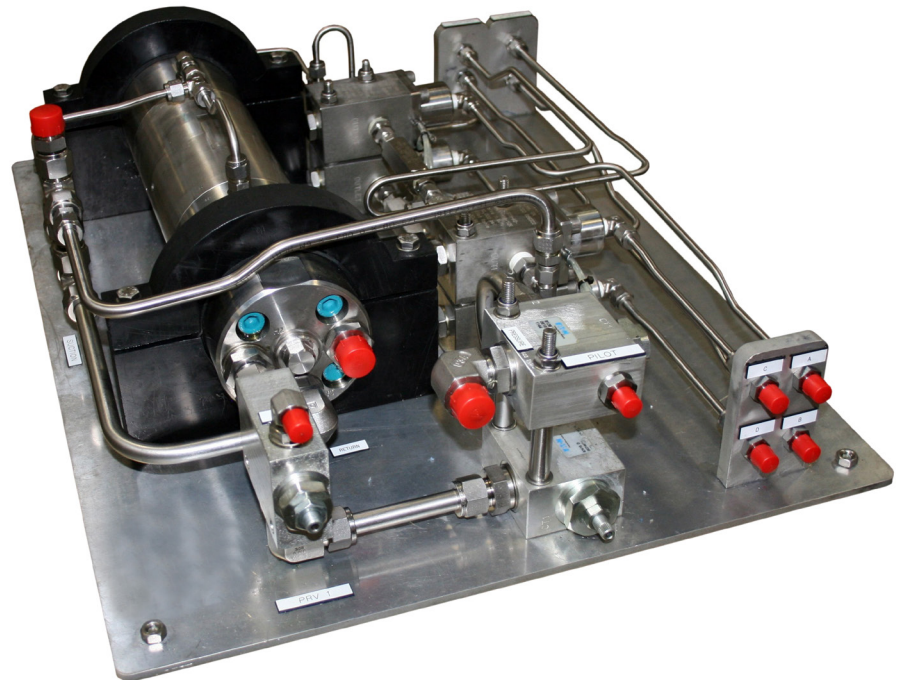

Pressure testing operations
BOP operations
Fluid transfer operations
Hot stab operations

Features

Isolated hydraulic power unit
Directional control
3 selectable pressures
690bar / 10,000psi max output

In the box

10,000psi IHPU
Test gauges
40ltr reservoir bag
Operational hoses
Operations and maintenance manual

10,000psi IHPU

Specifications

Maximum input pressure	210bar / 3045psi
Maximum input flow	40lpm / 10.5gpm
Maximum output pressure	690bar / 10,000psi
Maximum output flow	9lpm / 2.3gpm
Fluids	Water, glycol, hydraulic and mineral oils
Weight in air	62.5kg / 137.7lbs
Weight in water	53.3kg / 117.5lbs
Dimensions	610 x 465 x 242mm / 24 x 18.3 x 9.5in
