

Power Team Hand Pump

Compensated hydraulic hand pump

The Power Team compensated hydraulic hand pump delivers hydraulic fluid under pressure by directly applied manual effort. Power Team hand pumps, with the angled fill port, have a built in "relief valve" protection system. This system is designed to protect over-pressurisation of the reservoir from sudden back pressure. This system also works as a seal to prevent oil leaks.

Applications

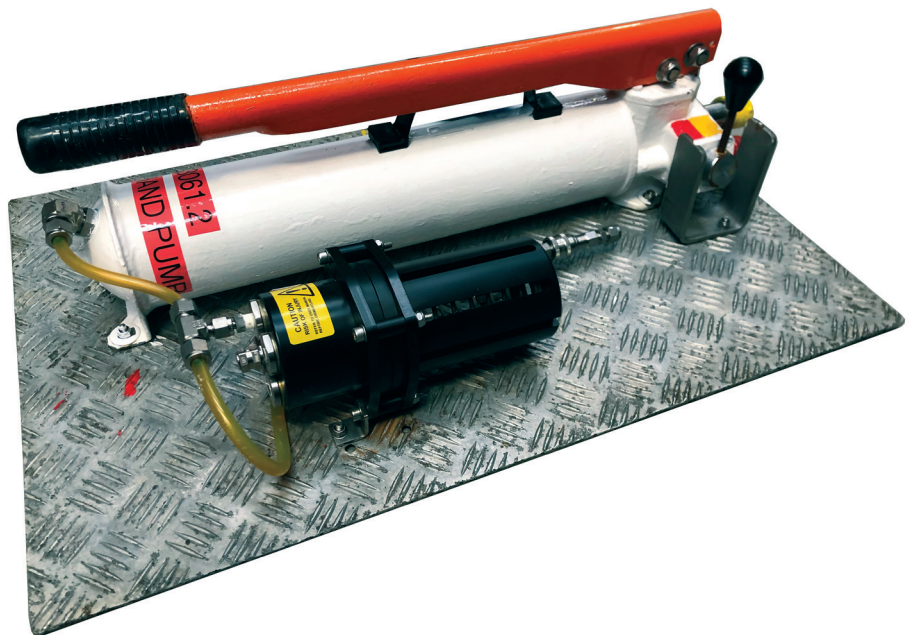

Diver cutting operations
Diver LAOT operations

Features

Rugged all metal construction
Heavy-duty, formed metal handle
Relief valve
Fitted with hydraulic compensator
Fitted with quick disconnects
Subsea pressure gauge

In the box

Power Team hand pump
Operational hoses
Operations and maintenance manual

Power Team Hand Pump

Specifications

Maximum output pressure	690bar / 10,000psi
Volume per stroke	42.6cm ³ (2.600in ³)
Oil capacity	2,491cm ³ (137in ³)
Weight	22kg / 48.5lbs
Dimensions	700 x 450 x 200mm / 27.5 x 17.7 x 7.8in
