

Intervention Completion Skid

Multi function Intervention Completions skid. 11 supply and return hydraulic proportional stations available for tooling applications. Tooling consisting of 60 L capacity multi fluid capabilities with Low Pressure Oberdorfer Pump and High Pressure Duplex Piston Pump with a pumping capacity from 0-12,500 psi , 17D Class 1-4 Torque Tool, Flying lead orientation tool, 5 station Tool control system and a 4 station RCU.

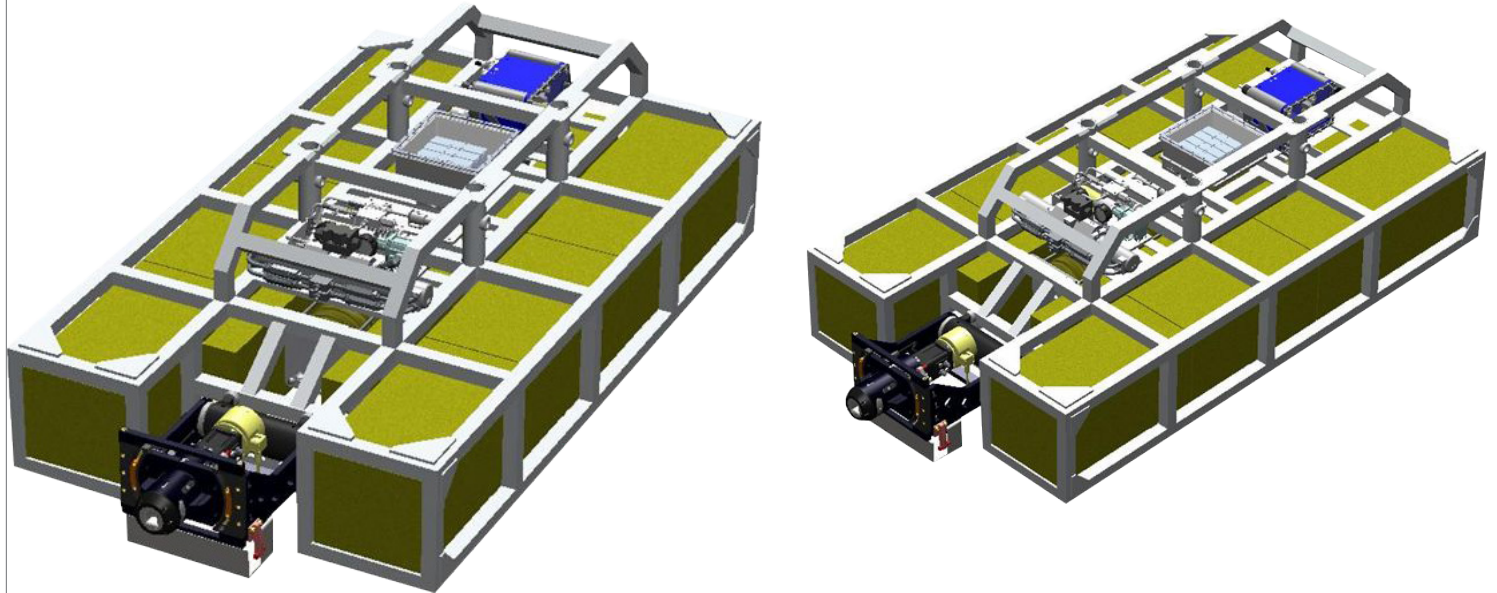

FEATURES

11 station functionality supply and return.

Ultra slim for minimum lift clearance in restricted moon pool applications.

Intervention Completion Skid

Technical data

Skid size (L x W x H):	2540 x 1530 x 460 mm
Skid height with fixing frame (mm):	730
Weight in air:	780 kg
Weight in water:	20 kg

Transport information	
Transport case (L x W x H):	2800 x 1000 x 1700 mm
Weight:	900 kg
