

## Vortex Seabed Sample Grabber

Designed for use in heavy swell with or without ROV

This innovative tool allows for greater flexibility to work in rough seas - when the tool is deployed through the splash zone, premature triggering of the bucket closing mechanisms is avoided.

This new design incorporates 650mm of vertical travel before the bucket closing mechanism is activated, dramatically increasing deployment capabilities in rough seas.

### Applications

Capture, contain and recover seabed samples

### Features

Unlimited depth rating  
ROV or crane operated  
Able to operate in rough seas

### In the box

Sample grab tool  
Operations and maintenance manual

# Vortex Seabed Sample Grabber

## Specifications

Maximum working load	250kg / 551lbs
Sample bucket capacity	0.01 cubic meter
Dimensions	1296 x 1200mm / 51 x 47.2in
Weight	115kg / 253lbs
