

## Vortex Softline Cutter

Specifically designed to cut dyneema rope

Supplied with relief valve set to 2200psi, this 'long reach' soft line cutter gives the option of putting more distance between the ROV and the work. Tested on 43mm kevlar reinforced ROV tether, taking only 500psi to sever the tether this is a unique alternative to heavy anvil type cutters enabling smaller ROV to operate this tool.

### Applications

Dyneema rope cutting  
Hydraulic hose cutting  
Cable cutting

### Features

Long reach  
Fail safe to open jaws  
No depth limit

### In the box

Vortex softline cutter  
Spare cutting blades  
ROV handle  
Operational hoses  
Operations and maintenance manual

# Vortex Softline Cutter

## Specifications

Hydraulic supply	137bar / 2000psi-241bar / 3500psi
Cutting force	4490kg / 9900lbs
Handle options	Fishtail or multi-grip
Jaw opening at tips	102mm / 4in
Jaw opening at widest	146mm / 5.7in
Length	815mm / 32in
Weight	20kg / 44lbs
