

Webtool SL75 Softline Cutter

Heavy duty softline cutter for subsea deployment

The SL75 softline cutter is a lightweight but heavy duty softline cutter designed for subsea deployment in severe working conditions. The open sided design allows for easy positioning on the line by ROV or diver and simple operation. The SL75 permits fast and efficient cutting of softlines and fibre ropes.

This softline cutter is corrosion resistant and has a durable coated aluminium and stainless steel construction. Genuine Webtool™ blades and anvils give the SL75 softline cutter optimum cutting performance and ensure that maintenance is kept to a minimum. The softline cutter's open sided design and no moving anvil makes deployment simple and reduces the number of hydraulic hoses required.

Applications

Softline cutting
Fibre rope cutting

Features

Hydraulically operated
Aluminium and stainless steel
Diver or ROV operable design
Quick and efficient operation
Long blade life

In the box

SL75 cutter
ROV handle
Operational hoses
Operations and maintenance manual
